

# Web-based Video Conferencing: Is Healthcare Ready for an Update?

Andrius Budrionis

## Outline

State of the art

VC as a service

GP-patient consultations

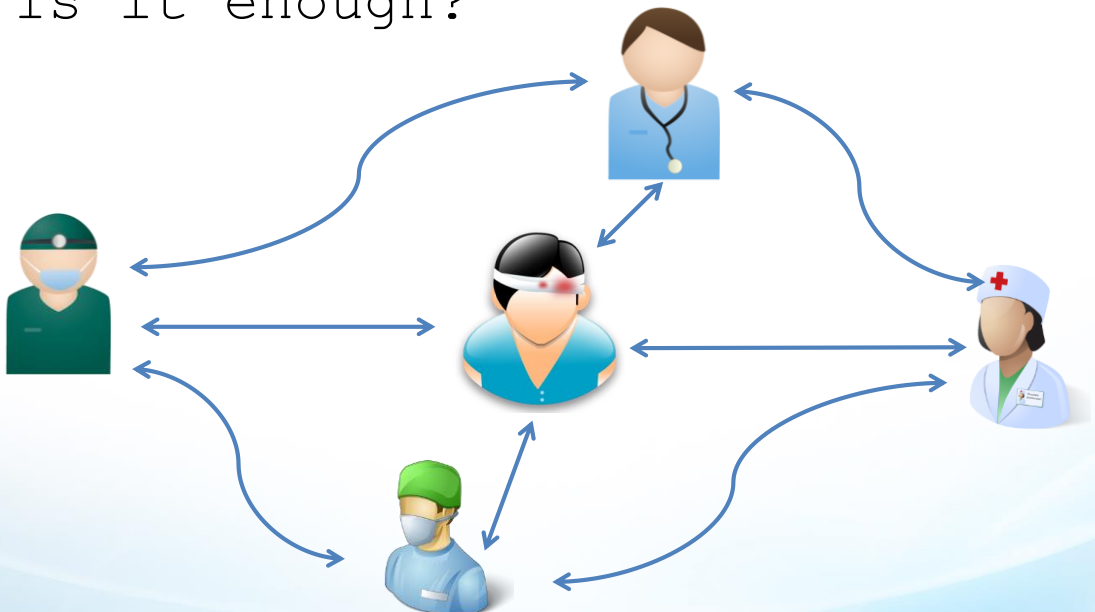

Quality and safety considerations

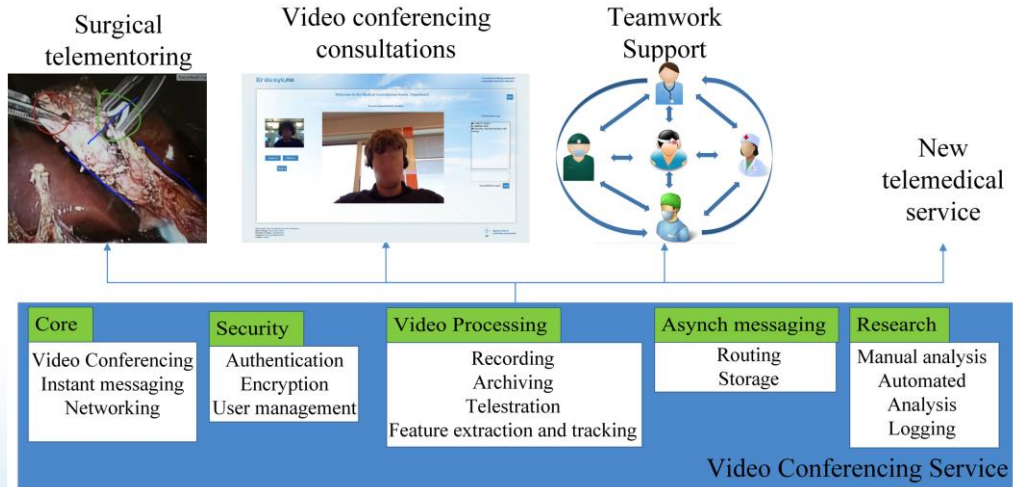

# State of the art

# Is it enough?

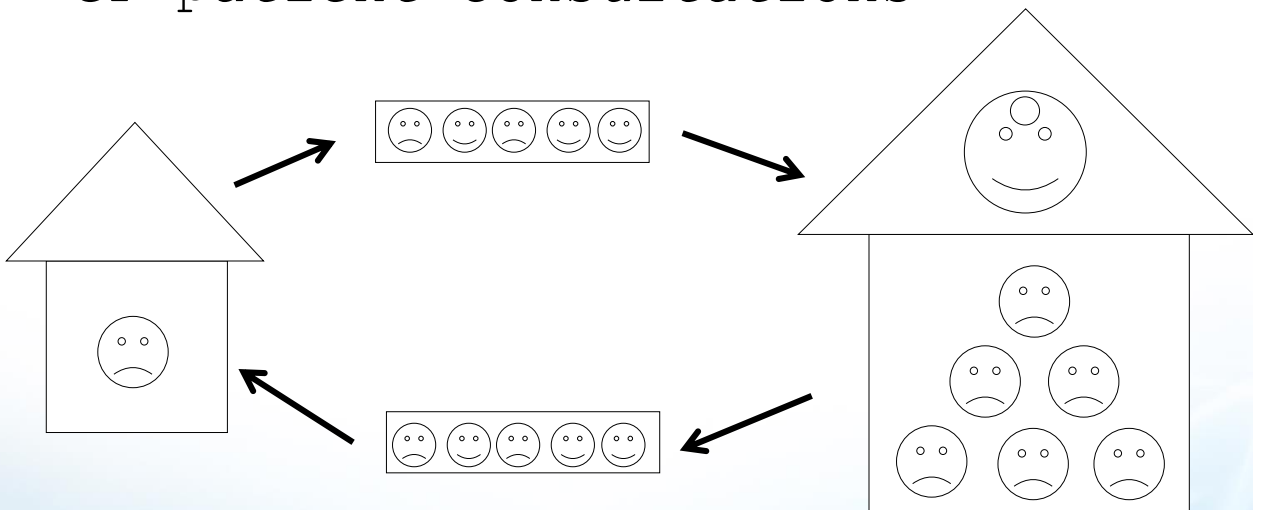

# One service to support all

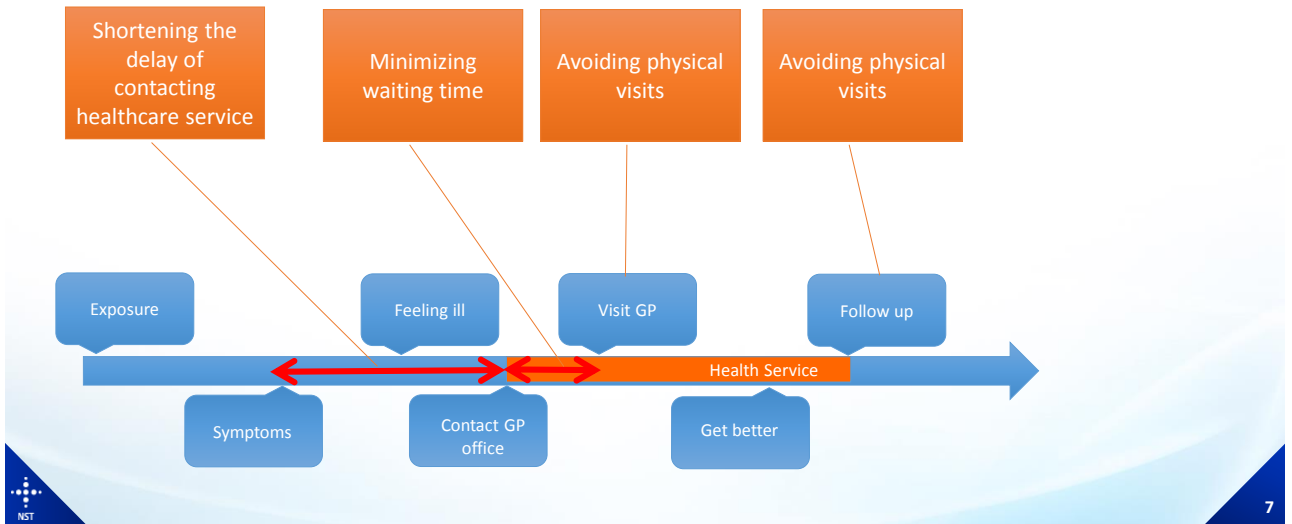

5

# GP-patient consultations

6

## How can VC increase quality of care?

## VC vs regular consultation

- Lowers threshold to access the healthcare service
- Eliminates the need for physical visits
- Minimizes the contact with other ill patients
- Opens new grounds for quality assurance (summary of the consultation, patient monitoring)

Thanks for listening
