

# The Norwegian Computer Society's Framework Agreement regarding Software Development

## THE NORWEGIAN COMPUTER SOCIETY

Translated from Norwegian version : 2  
Revised : 26.08.2008

This Framework Agreement may be entered into in connection with the Norwegian Computer Society's Maintenance Agreement for non-Standard Software, or independently.

The objective of this Framework Agreement is to govern the rights and obligations of the parties, in relation to software development services to be performed on the software delivered according to a separate agreement.

The contract consists of three parts:

Customer and Supplier are defined in the Contract Document ([Part I](#)), which also states duration and the order of priority of Part I, Part II and the Annexes in Part III.

The General Provisions for execution of the software development services are stipulated in ([Part II](#)).

Specific conditions relating to the Framework agreement are described in the Annexes ([Part III](#)). In addition the annexes include the Order agreements and Order log schemes.
